CAREER OBJECTIVE

Computer Science undergraduate with strong knowledge of Python, C++, SQL, Linux, and Machine Learning. Passionate about software development and cybersecurity, with hands-on experience building a Machine Learning-based Network Intrusion Detection System. Seeking an entry-level Software Developer or AI/ML role where I can contribute while continuously learning.

EDUCATIONAL QUALIFICATION

Bachelor of Science in Computer Technology (Pursuing)
Dr. N.G.P. Arts and Science College, Coimbatore
2024 – 2027 | 80%

Higher Secondary Certificate (HSC)
A.R.C. Matriculation Higher Secondary School
2024 | 80%

Secondary School Leaving Certificate (SSLC)
A.R.C. Matriculation Higher Secondary School
2022 | 73%

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, SQL
- **Machine Learning:** Scikit-learn, Pandas, NumPy
- **Web Technologies:** HTML, CSS, JavaScript, Flask (Basic)
- **Database:** SQLite, MySQL
- **Operating Systems:** Linux (Ubuntu, Kali Linux), Windows
- **Tools & Platforms:** VS Code, Git, GitHub, Jupyter Notebook
- **Networking & Security:** Linux Scripting, Network Traffic Analysis, Basic Cybersecurity

SOFT SKILLS

- Communication
- Leadership
- Adaptability
- Team Collaboration
- Time Management

INTERNSHIP

Machine Learning Intern — LITZ Tech

- Completed hands-on training in Machine Learning using Python.
- Worked on data analysis and predictive models.
- Enhanced analytical thinking and problem-solving skills.
- Collaborated with team members and presented project outcomes.

CERTIFICATIONS & ACHIEVEMENTS

- British Council – Aptis General English (Overall Score: 159/200)
- Certified in C Programming and LibreOffice Writer 6.3 – Spoken Tutorial, IIT Bombay
- Certified in Cyber Security Diploma Course at Dr. N.G.P. Arts and Science College.
- Certified in DBMS of NPTEL.
- Certified in IoT in NPTEL.
- Participated in the KPR College Mini Hackathon.
- Participated in a Startup & Entrepreneurship Workshop.

PROJECT

Network Intrusion Detection System (NIDS)

- Developed a Machine Learning-based system to detect malicious network traffic.
- Used Python, Scikit-learn, Flask, and SQLite for traffic analysis and attack detection.
- Classified network traffic as normal or malicious and displayed detection results.

Melitius – Diabetes Prediction System

- Developed Melitius, a machine learning-based diabetes prediction system to estimate diabetes risk from patient health data.
- Built using Python, Pandas, Scikit-learn, and Flask.
- Performed data preprocessing, model training, and prediction to improve classification accuracy.

LANGUAGES

- Tamil
- English
